

 OpenPM² 2018
CONFERENCE

Brussels, Charlemagne | February 1 & 2

Integrating Project
Management Standards
within Business Technology
Management (BTM)

gagnontech.org

btm-forum.org

stephane.gagnon@uqo.ca

Prof. Stéphane Gagnon
Université du Québec, Canada

Objectives

1. Meet PM² community, share with PM enthusiasts
2. Introduce BTM and plan to integrate PM² as core
3. Explain how PM² may benefit from BTM in return
4. Explore if PM² community may fast-track to BTM
5. Network with EU institutions concerned with BTM

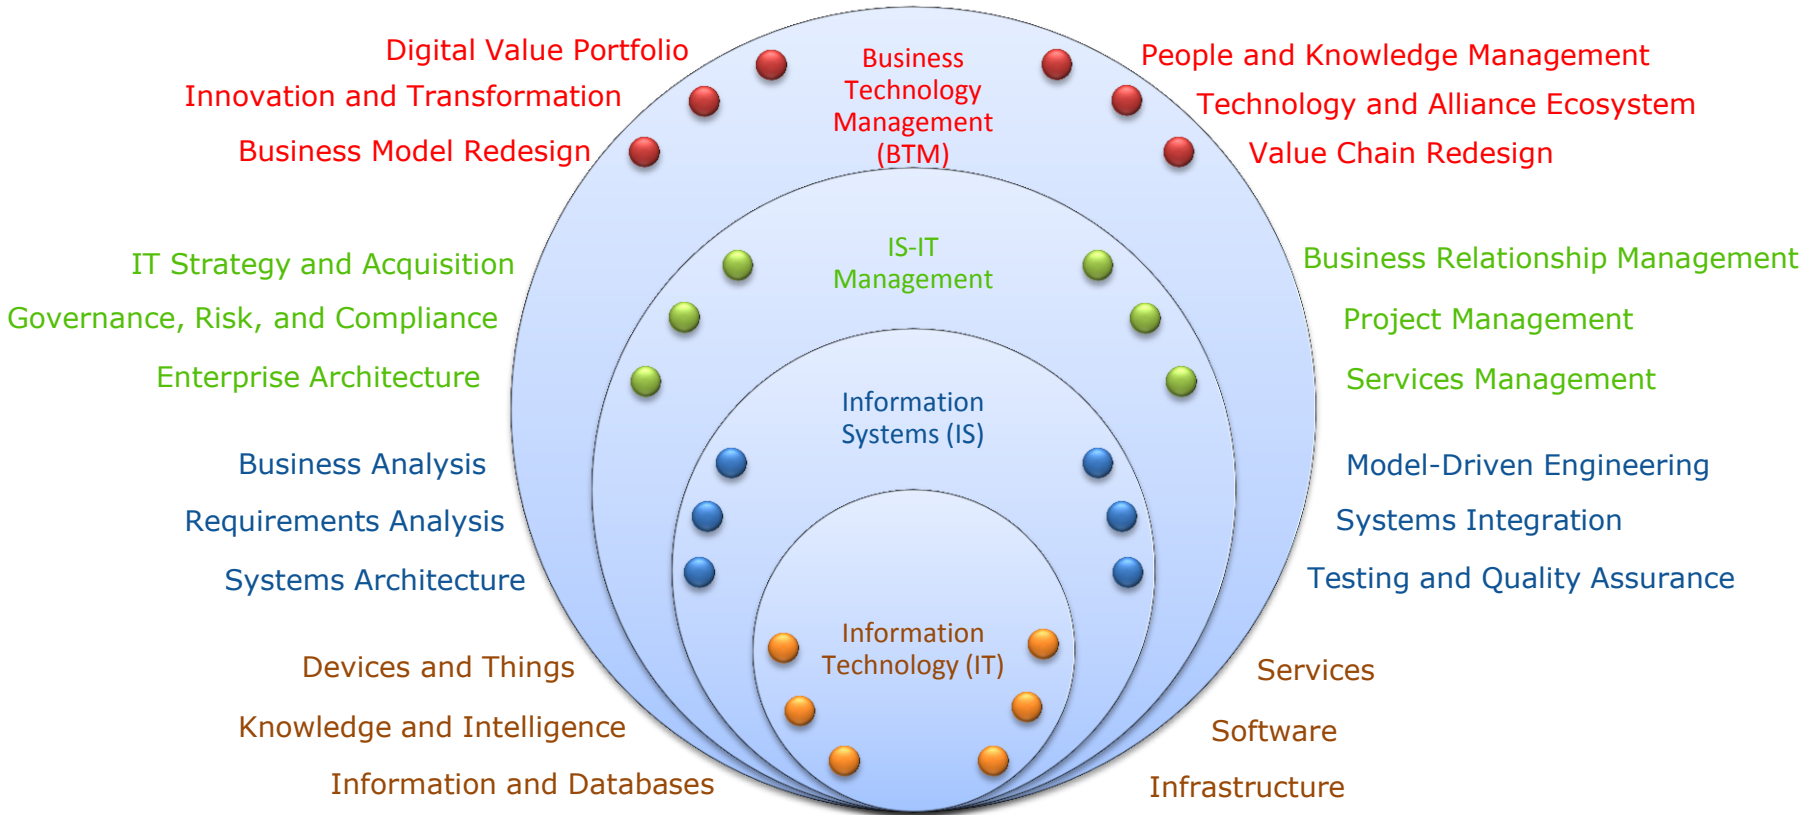

Why PM²? Why BTM?

1. PM² offers simplicity yet complete coverage of core value-driven concepts for BTM, flexible for customizing
2. PM² has one of one of the most complete “roles” model
3. Open PM² license is compatible with Eclipse Process Framework (EPF), the metamodel for BTM standards
4. Once integrated, PM² creates a language for BTM, and BTM enriches the language of PM² in return
5. PM² may benefit from greater process orientation and extensible ontology/metamodel (PM² interfacing)

1. Business Technology Management (BTM)
2. BTM Forum and Professional Community
3. BTM Body of Knowledge (BOK) Architecture
4. Integrating PM² as BTM Core
5. Possible Impact on PM² community

1. Business Technology Management (BTM)

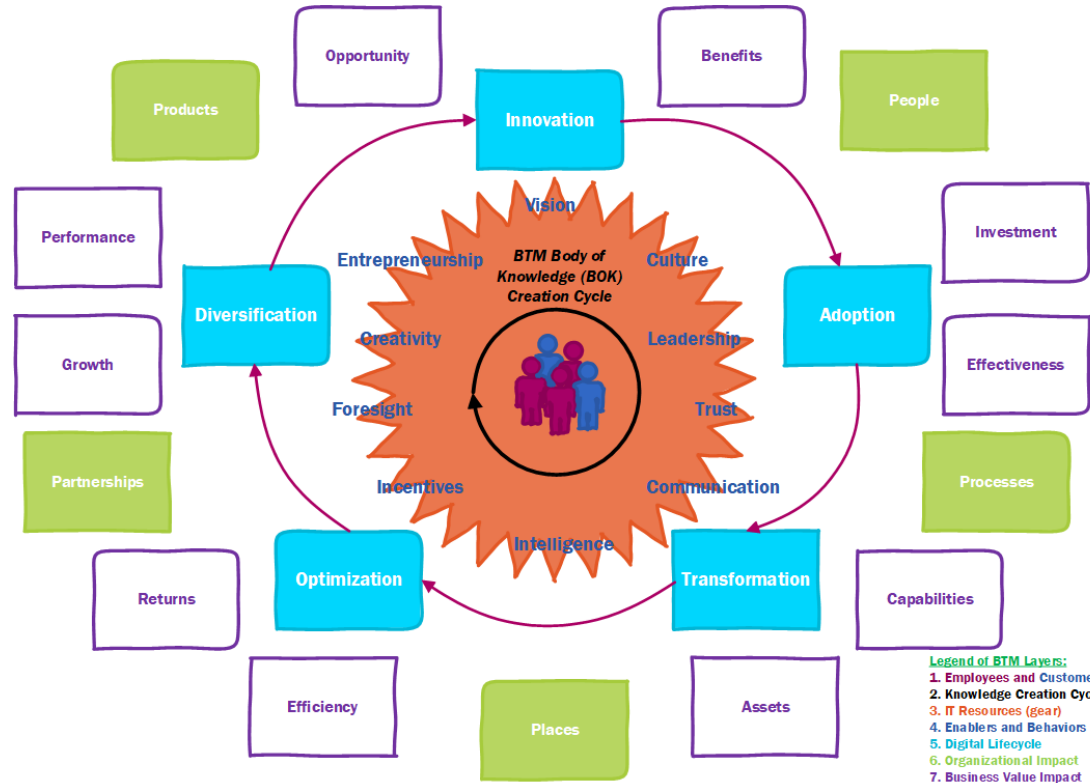

From Information to Business Technology

What is BTM?

- New professional designation: Business Technology Management (**BTM**)
- Unifying **Information Systems** (IS) and **Information Technology Management** (ITM) graduates within a stronger community of practice
- Stakeholders moving from an **information** to a broader **business** focus
- Emphasize distinctive professional abilities for digital leadership:
 - Renewed focus on innovation and digital value
 - Leaders of the digital lifecycle and transformation
 - Hybrid acumen as key to effective leadership

- A digital organization is one that has achieved a high degree of **business-technology-management “hybrid acumen”**
- The digital mindset is clearly visible in the 5Ps of your business strategy:
 - the **agility** in how your people use and master IT
 - the **innovative** application of IT throughout your processes
 - the **fusion** of IT in your products and services
 - the unusual places and ever **expanding** territory or things where you integrate IT
 - the strong, **transformational** leader positioning, in applying IT for business value, relative to other firms in your market and value chain
- This hybrid acumen doesn't come naturally, creative nurturing of people
- Creating the digital organization requires a different kind of professional
- Train digital leaders in **BTM**, the integrated/rebranded **IS-ITM Profession**

2. BTM Forum and Professional Community

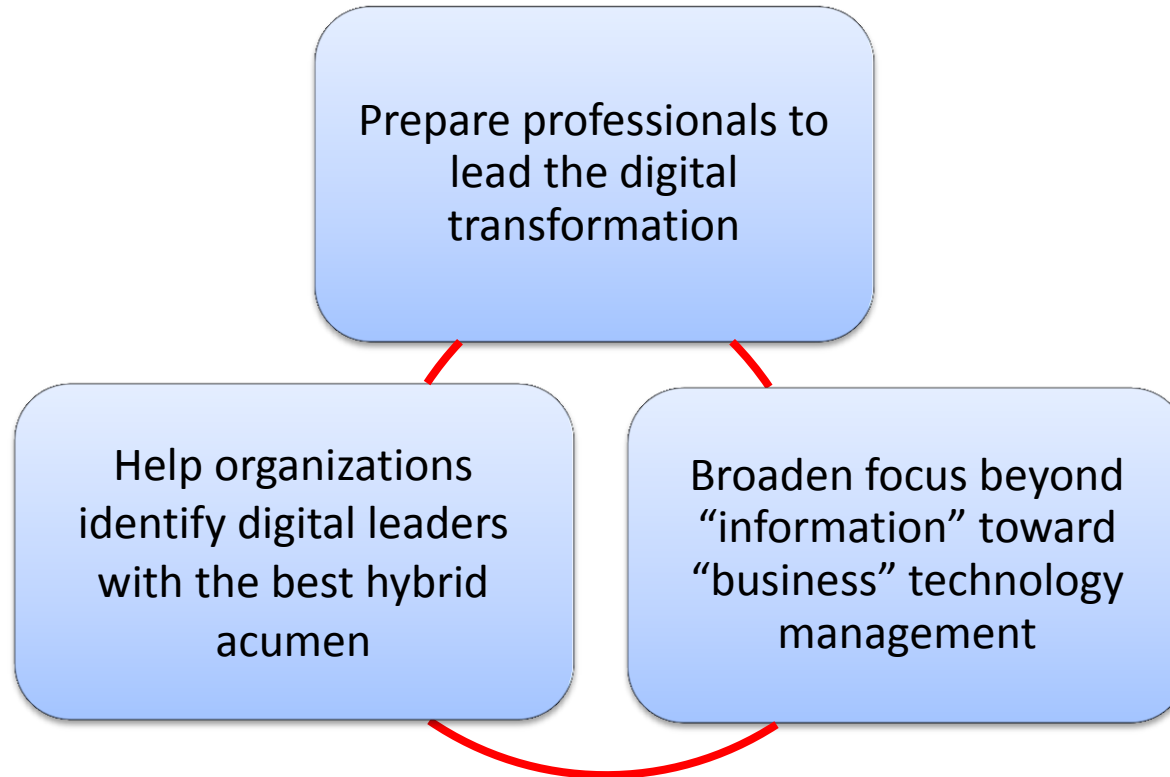

ITAC Talent

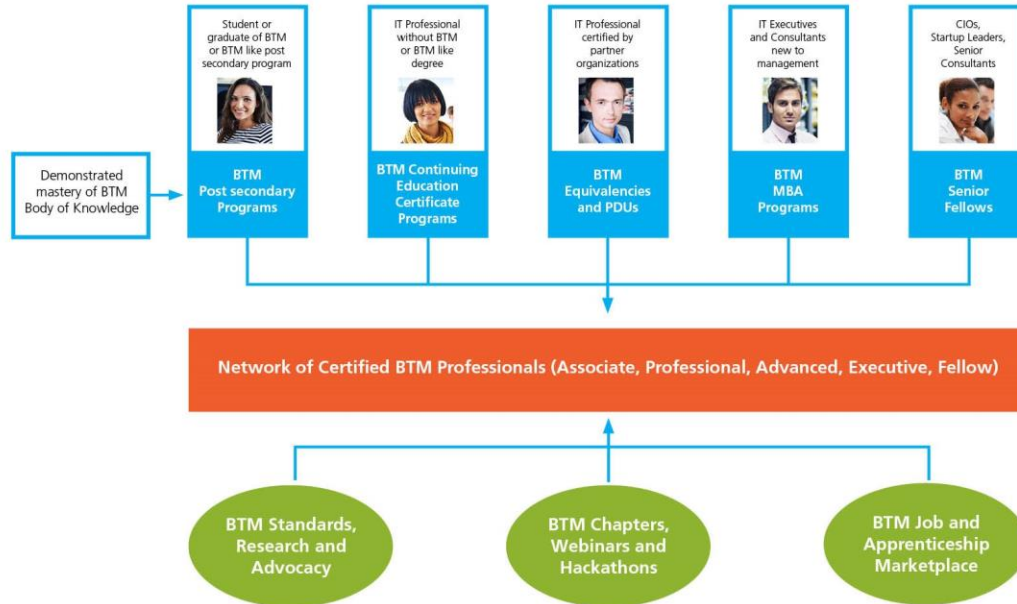

- Division of **IT Association of Canada**
- Addressing long term ICT talent and **skills needs** of all industries
- **Inspiring** to pursue ICT-related careers
- Accelerating the flow of talented people into **emerging** tech careers
- Leveraging **diversity** as a solution for prosperity and competitiveness
- Setting industry **standards** and raise the quality of education
- <http://itactalent.ca>

BTM Forum

- Founded in Fall 2016 to support a unified **BTM profession**, aiming for international
- Builds upon the BTM Initiative, an **accreditation** standard published in 2009, complete revision in 2016
- Develop an alliance with existing ICT orgs. to build an umbrella **certification** program
- Build a new **BTM BOK** to guide professionals in their career
- Web **community** to create dialogue
- <https://btm-forum.org>

BTM Forum Member Community

Benefits of BTM

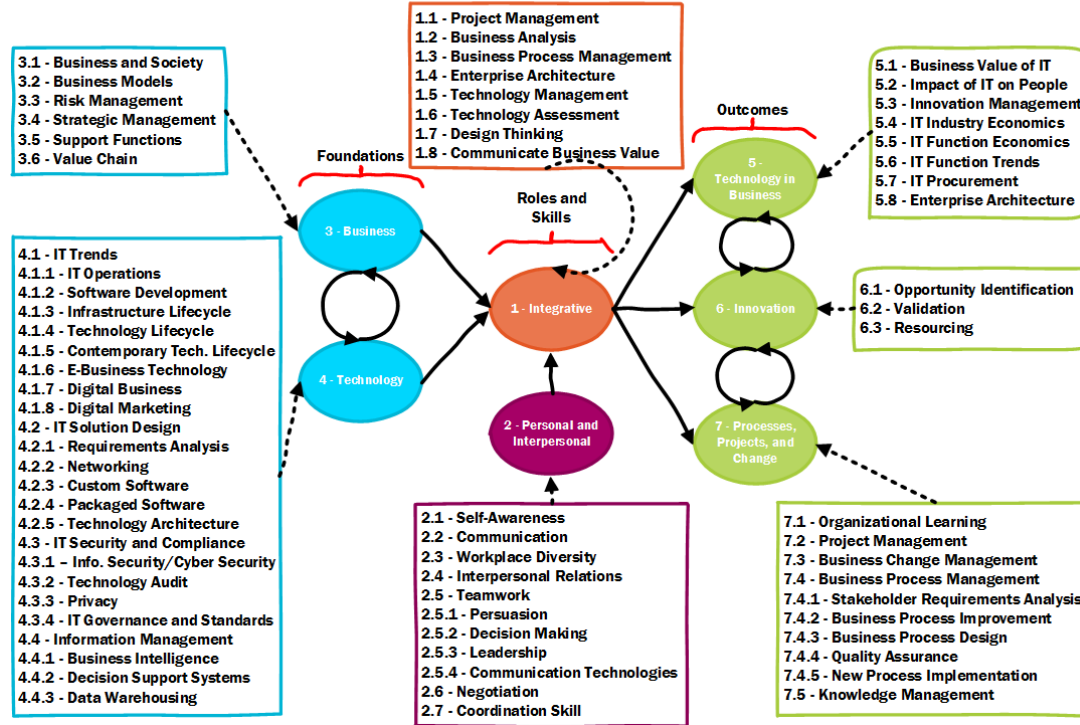

Benefits for from BTM BOK	... from BTM Certifications	... from BTM Community
Professionals	Students: clear guidance on career paths/growth	Practitioners: add new business/management skills	Careers: easy recognition of skill level by open network
Associations	Specializations: formal integration of several BOKs	Multi-Certified: complement certifications, no competition	Membership: recruit new members, wider visibility
Academia	Faculty: implement research across all specializations	Schools: clear accreditation and curriculum guidance	Enrollment: attract talent to get best jobs (cf., CPA, PEng)
Employers	Managers: formal transdisciplinary job profiles	Promotion: standards for promoting through ranks	Markets: well-defined talent pools, easier skills discovery
Industry	Innovation: more open, cross-specialization ideas	Vendors: all specializations have same tech. acumen	Start-ups: facilitate careers in-and-out of corporate
Society	Government: specializations share same principles	Business: higher org. to address complex ethics cases	Economy: fill talent gap, accelerate digital adoption

3. BTM Body of Knowledge (BOK) Architecture

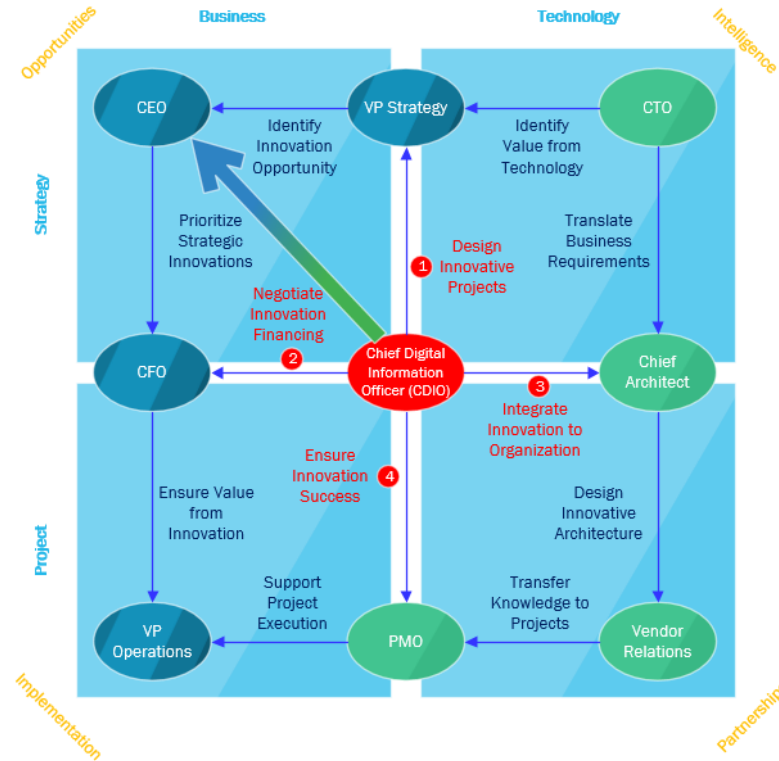

1. Develop a single **Body of Knowledge (BOK)**, building upon existing practices, to guide upcoming digital leaders toward the common core competencies of their profession
2. Use the BOK for:
 - Design of **seamless career paths** across multiple specializations for more complete experience and knowledge
 - Define **learning guidelines** to develop new BTM expertise
 - Certification of **digital leaders** at Associate, Professional, Manager, and Executive competency levels
 - Accreditation of **degree programs**, helping them meet job requirements for digital leadership roles

BTM Program Standard (v.2 - 2016)

BTM Learning Outcomes

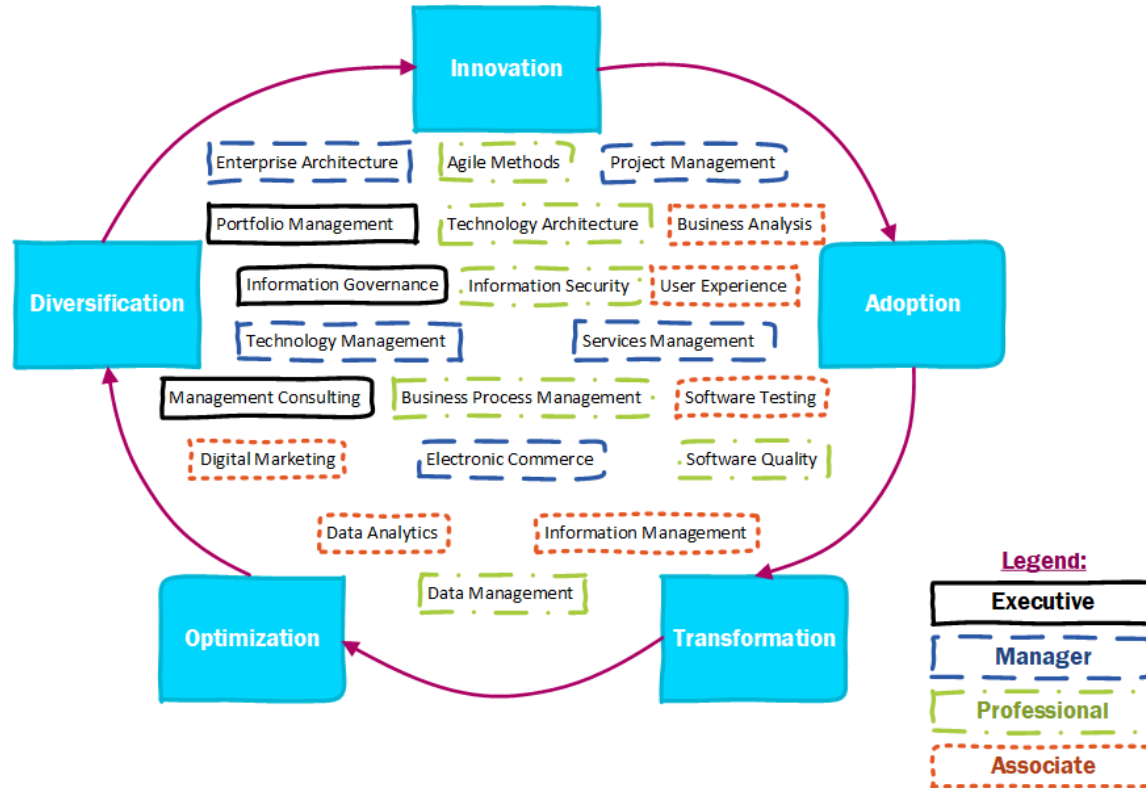

BTM Executives

BTM BOK and Certification Standards

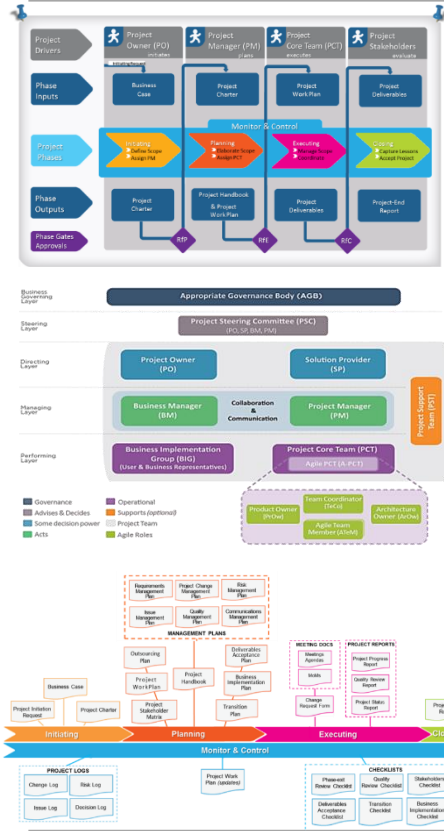

Level	Specialization	Standard	Title
Associate	1. Business Analysis	BABOK	Business Analysis Body of Knowledge
Associate	2. Data Analytics	CAP	Certified Analytics Professional
Associate	3. Digital Marketing	OMCP	Online Marketing Certified Professional
Associate	4. Information Management	CIP	Certified Information Professional
Associate	5. Software Testing	CTFL	Certified Tester Foundation Level
Associate	6. User Experience	UXBOK	User Experience Body of Knowledge
Professional	7. Information Security	CISSP	Certified Information Systems Security Professional
Professional	8. Agile Methods	CSM	Certified Scrum Master
Professional	9. Software Quality	CSQE	Certified Software Quality Engineer
Professional	10. Data Management	DMBOK	Data Management Body of Knowledge
Professional	11. Technology Architecture	CITA	Certified IT Architect
Professional	12. Business Process Management	OCEB	OMG Certified Expert in BPM
Manager	13. Electronic Commerce	CECM	Certified E-Commerce Manager
Manager	14. Technology Management	IT4IT	Information Technology for Information Technology
Manager	15. Services Management	ITIL	Information Technology Infrastructure Library
Manager	16. Project Management	OPM ²	Open Project Management Methodology
Manager	17. Enterprise Architecture	TOGAF	The Open Group Architecture Framework
Executive	18. Management Consulting	CMC	Certified Management Consultant
Executive	19. Information Governance	COBIT	Control Objectives for Information and Related Tech.
Executive	20. Portfolio Management	Val-IT	Information Technology Value Management

BTM Standards and Digital Lifecycle

4. Integrating PM² as BTM Core

This page is currently being modified by Christopher González Guerra

Roles > Basic Roles > Project Manager

Role: Project Manager

The Project Manager leads the planning of the project, coordinates interactions with the stakeholders, and keeps the project team focused on meeting

Role Sets: Basic Roles

Relationships

Project Manager performs: Assess Results, Manage Iteration, Plan Iteration, Plan Project

Project Manager responsible for: Iteration Plan, Project Plan, Risk List, Work Items List

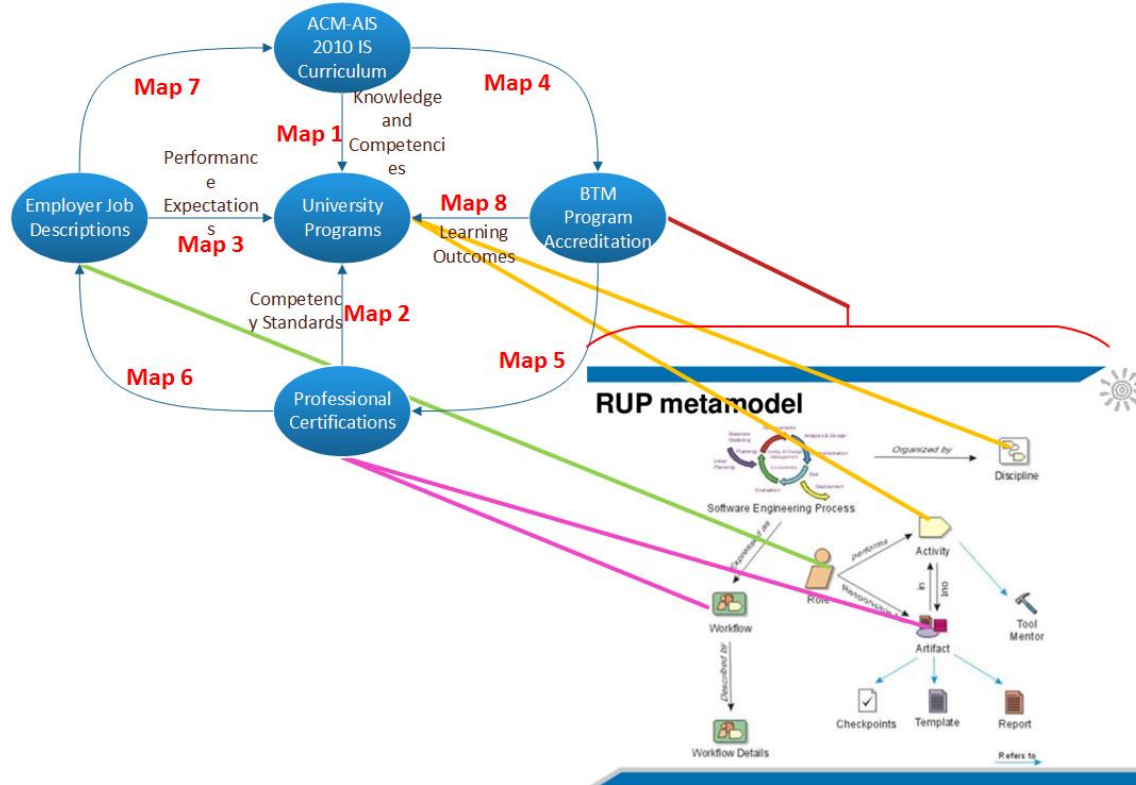

Additionally Performs

- Develop Technical Vision
- Envision the Architecture
- Refine the Architecture

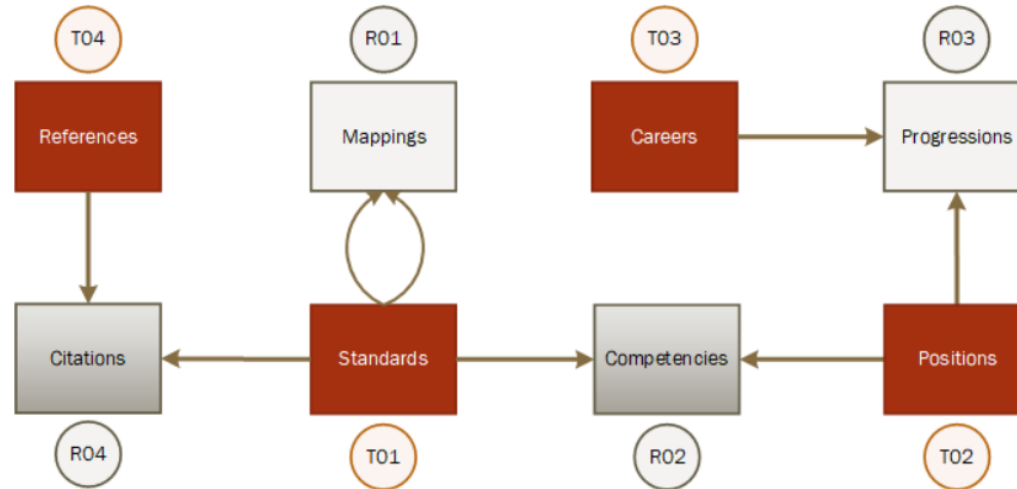

Modifies

- Iteration Plan
- Project Plan
- Risk List
- Work Items List

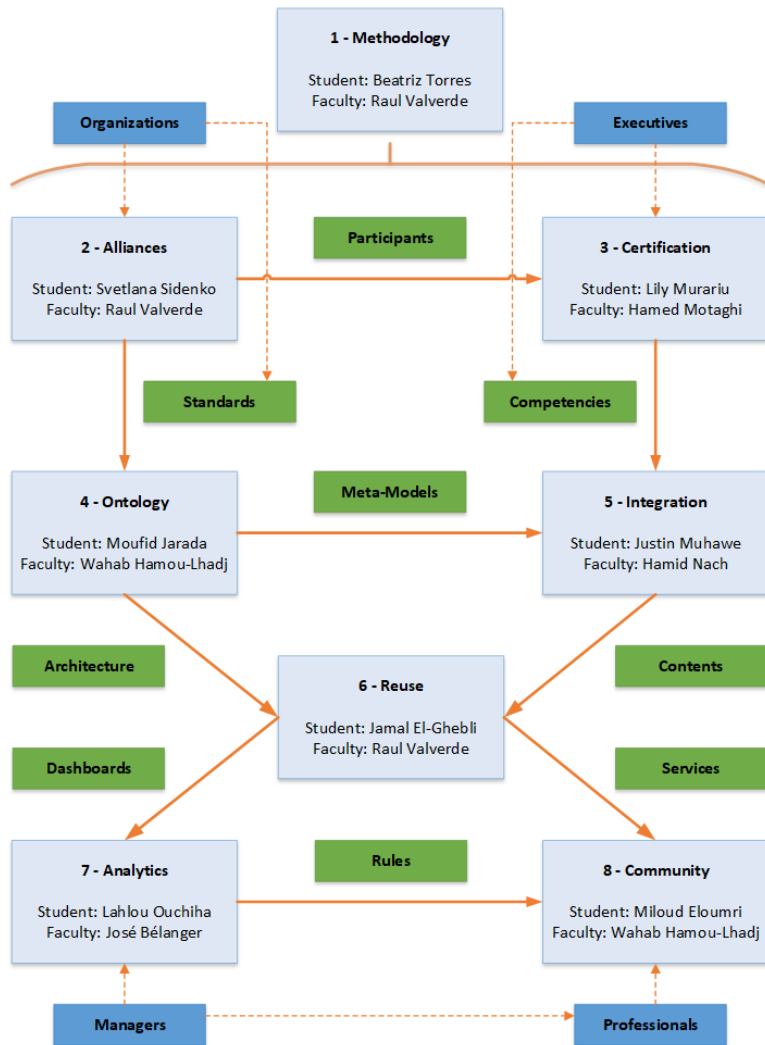

Mapping PM and BTM Metamodels

BTM BOK Standards Mapping Team

BTM BOK Team

#	Activities	Deliverables
1.	Methodology	Integrate and formalize innovative Agile and Open Source methods for the team.
2.	Alliances	Develop formal alliances with IT orgs., dev.-test business models, and get standards.
3.	Certification	Consult executives, develop competency standards, formalize certification levels.
4.	Ontology	Create meta-models, harmonize standards, create ontology, deploy BOK architecture.
5.	Integration	Integrate multiple standards into a core and extensions ontology, integrate maturity model.
6.	Reuse	Reuse BOK in HRM processes with flexible architecture, customize into micro-services.
7.	Analytics	Perform HRM analytics, integrate standard HRM processes, create business rules.
8.	Community	Build a P2P system to reuse and customize BOK references for HRM processes.

5. Possible Impact on PM² community

Institutional Capabilities

- Customize BTM to public sector
- Vendor-neutral digital framework
- Alliance with key BTM associations
- Open standards for all countries
- Translation and global reach
- Merge more open assets to EU's
- New ISA² Programme Standards

Professional Competencies

- PM² becomes more flexible/open
- Open UP wiki more engaging
- Reuse PM² and BTM in HRM tasks
- Integrate PM and BTM learning
- Quality of PM and BTM programs
- PM² certified can fast-track to BTM
- Make PM² a global community

Thank You !

Stéphane Gagnon, Ph.D.
